COVID-19 Safety Procedures & Working Practices.

This document has been sent to you in advance of our visit to your home to carry out either a measure, fit or delivery of products.

We will –

- Wash hands upon arrival. We will provide liquid hand wash and paper towels. All rubbish will be bagged and removed when leaving the premises.
- Wear shoes with disposable shoe covers.
- Wear face masks in your property if social distancing is not possible. This situation is more likely when a property is undergoing development where other trades are on-site and rooms are busier.
- Place our toolboxes and bags on disposable or washable sheeting.

We would ask you to:

- Open the door and step back inside your property allowing us to bring items inside.
- Provide hand washing facilities.
- If applicable, clear all ornaments, furniture, TV's etc. away from windows that are to be fitted or measured to reduce our handling of your property. If it is not possible to move furniture before our visit due to personal circumstances we will move the necessary items.
- Household members and pets should be isolated in separate rooms whilst work is undertaken.
- We will be practising social distancing at all times and would appreciate your assistance in making this possible.
- If at any point before visit either party shows any signs of infection in their households the appointment must be cancelled and rescheduled.

Thank you for your co-operation
